

# HEALTH CARE

Our Clientele a Institute of Mental Health And Social Sciences is one of the best in class hospitals and one of the biggest Mental Health centre's in Tamil Nadu which has a fully computerized hospital management and Digital record archiving for research and data mining.

The client had a requirement of developing a well-built management system to manage the activities of the hospital and to manage the informations of various departments. Their prime requirement was to create a practical system for maintenance which was reported to Shalom InfoTech.

After complete analysis on the requisite, our team members initiated new ideas in crafting the clinical software.

On the finalization of the target, goal, requirement and the design for the software Shalom supported their request with a complete package of hospital management system

The hospital management system has been designed to meet s  
ome of the requirements such as Details of the patients, fees, admissions and consultation, Provisions for monitoring the status of the hospital rooms and wards, Integration of internal communication between various departments of the hospital, Database storage of hospital records such as patient, doctors and medicinal details etc., Physician Database about their doctors, Information about various departments, treatments & services offered, Billing, Financial Accounting,
