

MANUFACTURING SOFTWARE & SOLUTIONS

Manufacturers face serious challenges from globalization and market volatility to increasing client demands, shrinking margins and more

CASE STUDY

O u r client, a prestigious unit among Ordnance Factories is primarily involved in Tungsten based Heavy Alloy and Allied products under ministry of defense, government of India is a premier organization manufacturing anti-tank kinetic energy projectiles.

They approached Shalom InfoTech to develop a high-qualified quality management application which enables the user to do a quality check of the components like SABOT, Tail, and Penetrator which industry oriented.

Sticking on to the client's requirement and with the effort to implement more of the techniques, procedures and tools our professionals entered into the mission of developing quality management application.

We have enhanced the application with many provisions and facilities that would be user friendly and especially in a way that it would satisfy the client. With these aspects our programming crew began the designing of the application with Admin Panel, Operator Panel, Supervisor Panel
